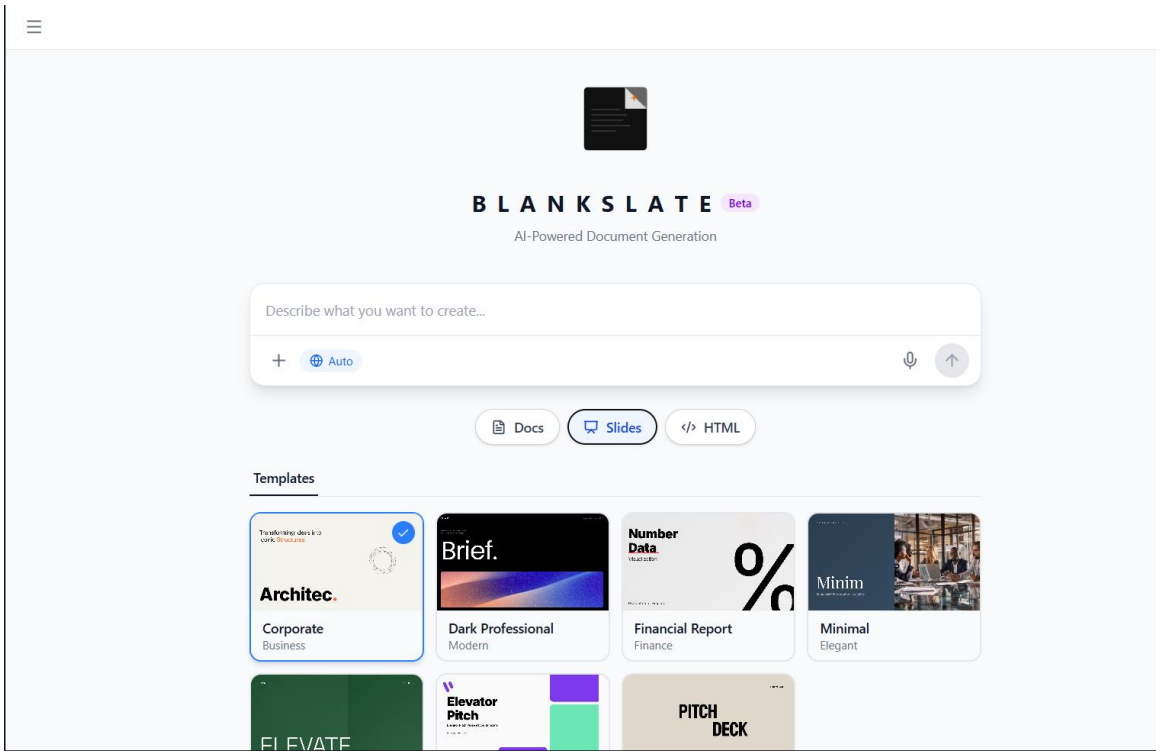
FAULTS REPORT DOCUMENT

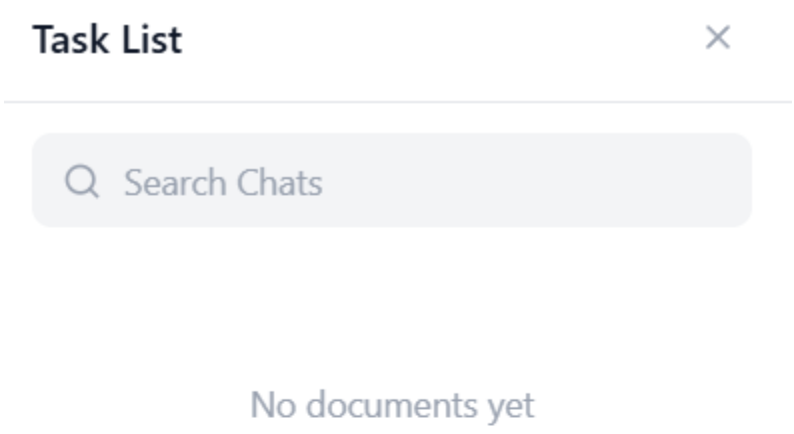
Fault Details

- In the BLANKSLATE when we tap on the slides then it is showing theme options and we cant scroll it up and down we have to zoom out or zoom in to see the full page



- In this image it is the landing page we cant scroll down we have to zoom out then we see the options so we should have the scrolling option.

- In the HTML part if the user don't know anything about the HTML feature user will ask what is this feature about so the agent should explain about the feature and then can start what the user wants.
- But now the html agent starts working if the user asked the agent what can you do with this feature. So we have to fix that.



- Now another issue the history is deleted whatever I did with BLANKSLATE .
